

3base™ Nucleic Modification Technology

EasyScreen™ Real-Time PCR Kits for the Rapid Detection of Infectious Diseases

- ✓ Maximise the number of pathogens tested per specimen
- ✓ Single efficient workflow for all specimen types using all EasyScreen™ Detection Kits
- ✓ High and low throughput capabilities
 - compatible with 96 and 384 well PCR plates

Available EasyScreen™ Detection Kits:

- Enteric Viral, Protozoan & Bacteria (22 Targets)
- Respiratory (14 Targets)
- Coronavirus (3 Targets)
- STI Genital Pathogens (16 Targets)
- ESBL/CPO (16 Targets)
- Flavivirus & Alphavirus (17 Targets)

Hear about 3base™ Technology & EasyScreen™ Kits at the NRL workshop:

Tuesday 16 October
10:00am-10:15am

“EasyScreen™ Multiplex PCR for STI Infections, a Year in Review”

Damien Stark

Please contact us for more information on upcoming EasyScreen™ Detection Kits:

- Atypical Respiratory
- Viral, Bacterial and Fungal Meningitis
