

Quarterly Activities Report - 31 December 2018

Genetic Signatures Limited (ASX: GSS, “**Genetic Signatures**” or the “**Company**”) is pleased to report on its activities for the quarter ended 31 December 2018 (“2Q FY19”).

Highlights

- **Strong revenue growth of +83% on pcp to \$1.2m in 2Q FY19**
- **Cash receipts for the quarter of \$1.2m**
- **EasyScreen™ Respiratory Pathogen Detection Kit received European (CE-IVD) registration and Australian (TGA) application submitted**
- **International expansion progressing with additional appointments of key European sales executives**
- **Appointment of highly experienced CFO in October 2018**
- **Strong balance sheet with cash of \$8.8m at 31 December 2018 with no debt**

Genetic Signatures CEO, Dr. John Melki commented:

“2018 has been a year of significant progress for Genetic Signatures. Sales traction is building with continued strong quarterly revenue growth.

We are seeing increased interest in our EasyScreen™ products and are bolstering our international sales teams with recent additional European appointments. During the quarter we submitted both domestic and European approvals for our Respiratory Kit and were successful in having this kit CE/IVD-marked in December.

Sales update

Figure 1: Genetic Signature’s quarterly revenue (A\$’000)

Genetic Signatures again recorded impressive growth in 2Q FY19, with sales revenue of A\$1.2m, an increase of +83% over 2Q FY18. The Company is well positioned to continue executing its international commercialisation strategy leveraging the strong momentum of our domestic business.

Genetic Signatures continued to achieve quarterly revenue growth throughout 2018 and anticipates this trend will continue into 2019 as the Company progresses regulatory submissions of its pathogen detection kits, including those intended to detect sexually transmitted infections (STI) and Alphavirus / Flavivirus, in key regions.

International and Domestic sales update

Prior to the quarter, the Company announced a major new contract with a large Australian pathology service provider and launched two new products, the second generation *EasyScreen*TM Respiratory Pathogen Detection Kit and the Genetic Signatures Automation System (GS1-HT). Orders from this new customer have steadily increased, reflecting customer satisfaction and product validation.

Genetic Signatures' has also made significant operational progress internally and is continuing to bolster its European efforts with its expanding sales force in Europe. Recent appointments are expected to help drive increased European customer interest in the near-term.

Regulatory update

In December 2018, the Company achieved European registration (CE-IVD) for the *EasyScreen*TM Respiratory Pathogen Detection Kit, permitting sales across Europe. Australian registration (TGA) was submitted during the quarter and is expected to follow in the coming months. These regulatory approvals, in conjunction with the August 2018 signing of a large domestic customer of the Respiratory Kit positions the Company well to generate further interest in the kit both domestically and internationally.

During the quarter, Genetic Signatures continued to progress European and Australian applications for the *EasyScreen*TM STI / Genital and Flavivirus / Alphavirus Detection Kits with submissions anticipated in 1H CY19. Further, the Company is also in the early stages of developing additional kits to broaden the Company's portfolio.

Genetic Signatures' also continued the regulatory activity for its *EasyScreen*TM Enteric Protozoan Kit in the US, with FDA clearance anticipated in 2019. The US represents a significant market opportunity for the Company as it looks to continue executing on its US commercialisation strategy and focus on the ASR offering.

Conference update

Medical and industry conferences are an important means to drive positive exposure of Genetic Signatures *EasyScreen*TM brand and the benefits of *3base*TM technology. Key events the Company exhibited and presented during the quarter include:

- NRL Molecular Diagnostic Workshop on 15-16 October 2018 in Melbourne
- Association for Molecular Pathology (AMP) Annual meeting on 1-3 November 2018 in San Antonio, Texas

Corporate update

An appointment of a highly experienced CFO, Peter Manley, was made in October 2018. Peter has extensive experience as a finance professional in the life sciences industry having served as CFO and company secretary for both AtCor Medical Holdings Limited (now Cardiex) and Sirtex Medical Ltd.

At 31 December 2018, the Company held \$8.8m in cash and cash equivalents which represents an increase of \$1.4m since 30 September. It includes receipts from customers in the September quarter of \$1.2m and a refund from the Australian Tax Office (ATO) under the R&D tax incentive program of \$2.6m, as disclosed in the attached Appendix 4C report.

Upcoming Activities

- Primary focus remains sales growth in both international and domestic markets
- Commencement of new product trials with customers in the US and EU in addition to progression of trials already underway
- Potential receipt of regulatory registration for *EasyScreen*TM Respiratory Detection Kit in Australia
- Potential receipt of regulatory registration for *EasyScreen*TM STI / Genital Pathogen and Flavivirus / Alphavirus Detection Kits in Australia and Europe
- Increasing presence in US market through additional sales of extended ASR range and participation at industry events
- Continue progress towards FDA listing with scientific validation and further clinical trials

- END -

About Genetic Signatures Limited: Genetic Signatures is a specialist molecular diagnostics (MDx) company focused on the development and commercialisation of its proprietary platform technology, **3base**[™]. Genetic Signatures designs and manufactures a suite of real-time Polymerase Chain Reaction (PCR) based products for the routine detection of infectious diseases under the *EasyScreen*[™] brand. Genetic Signatures' proprietary MDx **3base**[™] platform technology provides high-volume hospital and pathology laboratories the ability to screen for a wide array of infectious pathogens, with a high degree of specificity, in a rapid throughput (time-to-result) environment. Genetic Signatures' current target markets are major hospital and pathology laboratories undertaking infectious disease screening.

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standard applies to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
